7th WORLD CONGRESS of ASIAN PSYCHIATRY

MENTAL HEALTH CARE ACROSS ASIA: UNION IN DIVERSITY

21-24 FEBRUARY 2019 • SOFITEL SYDNEY WENTWORTH

The Asian Federation of Psychiatric Associations and the Royal Australian and New Zealand College of Psychiatrists invite you to attend the 7th World Congress of Asian Psychiatry to be held in Sydney from 21-24 February 2019.

The Congress will bring together academics, researchers and practitioners from Australia and overseas and will provide a unique insight into the work of psychiatry for those working throughout Asia, as well as profiling the important role that psychiatry holds at the cutting edge of research and practice. It is envisaged that the 2019 WCAP will provide a forum for showcasing our work and addressing some of the many difficult challenges our profession incurs on a daily basis in this region. Come and join us in Sydney at what promises to be an event not to be missed.

PROGRAM

Hear from a diverse and inspiring array of international and national plenary speakers. The 2019 WCAP will also provide a foundation for future collaboration and sharing of knowledge among delegates. Alongside the exciting and stimulating scientific program, there will be an opportunity to network and collaborate with peers during social activities.

SUPPORT AND EXHIBITION

Organisations wishing to participate as a Congress Supporter or Exhibitor may do so by downloading the prospectus from the 2019 WCAP website.
